

## Vol 20 July Website Report

Hello,

I am proud to report that the monthly visitor count continues strong. SCAUWG.ORG was recently garnering good weekly visitor counts, but during the last few weeks, we saw 937, 940, and from 7/5-11 we were visited 1249 times. The Monthly Result in on 7/31/2020 for the month of July reported 4481 monthly visitors.

The goal is to publish pertinent aviation airspace safety material, flight educational support, commentary and notices that will benefit the aviator community at large.

Title slides on SCAUWG.ORG have featured:

- CNO Airport traffic pattern vs the Ontario Class C circumstance
- VFR Uncommon Chart Symbols
- NATA's Safety 1<sup>st</sup> Clean program
- SFAR 118 – the latest revisions
- AMEPilot – the Spring Summer Edition of our original Aviation Medicine series authored by Van Nuys AME, Dr. Gregory Hanker, M.D.
- Possible name change for John Wayne Airport amongst other airports as well

The INFO WAREHOUSE this month (July) now includes:

- The planned new 56-day publishing cycle for VFR Charts
- Stupid Pilot Tricks
- AOPA's video on managing stress
- ATC at its Best – a submission sent to us by Tom Lasser
- Sully adding his voice to the lobby against potential GPS jamming.
- And a lot more

The EVENTS page by the way contains a very neat collection of calendared entries that might not show up all in the same place, and maybe will offer some an opportunity to explore more when desiring to find pertinent opportunities.

Last month the **NEWEST PAGE / TOPIC** Addition to the site was our **BLOG PAGE**.

Per our discussion last week, I added a post entitled “ASK SCAUWG” for an official group response. Unfortunately, it has inspired a tremendous amount of SPAM. I may relocate the Blog Feature and replace it on the Menu Bar with this month’s NEW EDITION to the site.

**ChartAware** our Flight Planning – Training Area Airspace Identification Application now has a NEW companion application entitled **ChartCompare**. More on ChartCompare in a bit as cartographer Mike Carson will demo it. (referring to the July SCAUWG meeting agenda) **This application will in an instant graphically spots chart changes on a new edition verses the replaced edition of a Sectional, TAC chart, or Flyway chart.** No one has ever done this before! You can choose the local you wish to survey as well. You can visit ChartCompare by clicking [Here](#).

*Post Meeting Note: Flight Planning Apps & Info is a new Tab on the SCAUWG.ORG Menu Bar. There you will now find ChartAware, Chart Compare, and Practice Area Data. The SCAUWG Blog can now be found under Commentary.*

Thank you to all! Thank you to the folks at ALPA, AOPA, NBAA, AVweb, AINonline and to folks like Tom Lasser, Mike Carson, Lee Unger, Fernando Morales, Randall “Steve” Nelson, Joe Santoro, and to all of those who send in material and contribute to the site. A reminder: you are certainly invited to participate in the production of SCAUWG.ORG as well! Just call or send an e-mail.

And with that, this has been the official current website report for July 15, 2020.

Be Well and Fly Safe.
