

Vol 31 SCAUWG.ORG February Website Report 2022

Hello all,

The service provider report shows that last week we received 833 real person logons. I am happy that we're being visited over 3000 times monthly.

I am also flattered that SCAUWG.ORG can serve as a megaphone that can help to popularize important LOAs, Safety Videos, and Airport details that pilots who visit the Western Region can benefit from knowing about. Thanking Rex MacLean, Stephanie Tandberg, Joe Santoro, and Ramin Panahi for their regular contributions.

Website spotlights shine on all of those who contribute to making the website what it is.

Mike Carson, a contributing editor, updates all the navigation charts that ChartAware makes available. Tom Lasser, a contributing editor almost daily sends area news, helicopter news, and meaningful content. Lee Unger, a contributing editor keeps the Arizona Page in flight. Guido Fernandez regularly sends aviation news and safety notice info. Also, we are happy to help contribute to the effort Charles Gunderson is pursuing in San Diego.

This weekend we published the newest issue [the winter 2022 edition] of SCAUWG.ORG's original publication, "AMEPilot." AMEPilot is written by contributing editor Dr. Gregory Hanker M.D. & Senior AME.

This newest edition joins the educational content that we publish on the Airspace & Info Warehouse pages, the commentary we present on the Short Take Pages, the current Events we list, the GPS Testing alerts, LRSATs, the Airport & pilot group pages, and a host of other services that we offer.

Everyone is invited to join us. I am particularly seeking airport notices and safety information that pilots need to be aware of.

I can be reached at ronberinstein@hotmail.com or contact SCAUWG on the website homepage.

That's it, folks! This has been the official website report for Tuesday, February 8, 2022
