

## **Santa Maria Airport - Construction**

Construction at SMX will be on the ramp and taxiway areas adjacent to the Radisson hotel.

The work area consists of Taxiways A (southeast of Taxiway U), A7, A8, V, and W. These areas will be closed beginning April 20, 2023, until early October.

Runway 30/12 will be closed intermittently from 2200 until 0600 local during the same period. Since Runway 2/20 is unlighted, SMX will be effectively closed on those nights when 30/12 is closed. I've been informed that there have been some discrepancies between some third-party EFB apps and the FAA website (<https://notams.aim.faa.gov/notamSearch/>). It is imperative that all pilots check the FAA site to be sure they have the most accurate information.

Also, be aware that there will be personnel and vehicle operators at the airport that may or may not be available for aircraft operations. As pilots we are ultimately responsible for the safe operation of our aircraft, so be alert and be careful out there.
