Effective: 06/05/2024 1200 (UTC)
Letter to Airmen: LTA-SBA-7

Subject: Taxiway Signage Changes At Santa Barbara Municipal Airport

Cancellation: 07/24/2024 1200 (UTC)

A multi-phase construction project to improve markings, signage, and lighting on the airport will continue through July 24, 2024. Concurrent with construction progress, existing taxiways will be renamed in accordance with FAA standards, and to enhance pilot situational awareness.

The project impacts the following aircraft operations:

- SBA airport will be closed intermittently via NOTAM, 0000 to 0500 local time.
- Taxiway signage will incrementally change overnight. Pilots should remain vigilant when checking NOTAMs as they will change frequently.
- SBA Tower will initiate progressive taxi instructions to the extent possible.

IMPORTANT: *Taxiway renaming will NOT align with the airport diagram charting cycle. It is imperative that pilots check NOTAMs frequently and conduct thorough preflight planning. If uncertain of any instruction or taxiway location, verify with the Tower.*
