RE: Change Flight Rules Arizona

Dear Sir:

I have looked over the proposed changes and am concerned with the supersonic speeds at Tombstone, Jackal, and Morenci. The Bisbee-Douglas Airport, Safford Airport, and Clifton/Morenci Airport are located within these MOAs.

The following are my concerns:

KDUG VOR-DME 17 there would be only a 450 foot clearance from the 5,000 foot AGL supersonic aircraft when utilizing this instrument approach. (Approach starts at 8,700)

KSAP RNAV GPS 12 there would be a 78 foot clearance from the supersonic aircraft when doing this instrument approach. (Approach starts at 8,700msl)

KCFT RNAV GPS-A there would be a 298 foot clearance from the supersonic aircraft when doing this instrument approach. (Approach starts at 8,500msl)

Sincerely,

Barbara L. Harper, DM
